

Workshop: WS 10 Adapting to Climate Change

Cluster: Infrastructure

What have we learned?

Numerous instruments and examples exist to guide urban adaptation. We have to consider climate adaptation as preventional policies. A strong mandate for the authority to implement adaptation measures is requested.

How can we contribute to local climate action?

Integrated approach for communities
Bottom-up approach
Identify local change goals

Next Steps?

We need to consider requirements for climate change adaptation
We shall consider to make an adaptation strategy a requirement for funding
We need to better integrate adaptation, mitigation and urban adaptation projects!
