

Workshop: WS 12 Climate action as Part of a New Urban Agenda
(UN Habitat)
Cluster: Infrastructure

What have we learned?

Cities need to be empowered!

Climate Change is also an institutional problem

$\frac{2}{3}$ of the SDG can only be implemented on a local level

Cities depend on reliable funding that is predictable

How can we contribute to local climate action?

Empowering the local level (subsidiarity principle)

Sufficient financing (money should follow task)

Different levels should cooperate + communicate

Involve stakeholders

Next Steps?

Make the Habitat III Process more transparent

Local commitment to engage in formal climate action

programme to be anchored in Paris outcome
